

SmartCOMM™ Hosted IP Complete

As the name implies, SmartCOMM™ Hosted IP Complete is a complete communications package. Hosted IP Complete replaces your old phone system, includes IP phones, high-speed Internet and all the productivity applications your business needs.

Smarter Business

Why make large capital investments into something that is outdated the moment you take it out of the box? SmartCOMM™ Hosted IP Complete is an ageless, feature-rich replacement to your current, on-premise phone system that will grow with your company instead of slowing you down.

Reliable Technology

Grid4's Hosted IP PBX solution, combined with a 100% IP network and smarter IP applications, give you more features and increased functionality.

Smarter Savings

Grid4 performs all upgrades and removes all license fees and maintenance costs while eliminating capital expense.

Flexibility

Easily manage your phone system anytime and anywhere through a simple, online user interface.

Efficient Call Management

Utilize "big-business" call management features such as auto attendant, music on hold, caller ID, call forwarding and conference calling.

Mobility

Integration with mobile devices provides the ability to easily manage a mobile workforce.

Smarter Scalability

Scale up or down immediately; add features and/or users when you need to.

Unified Communications Enabled

Voicemail and faxes are delivered directly to any e-mail address.

24/7 Support

Around the clock support from Grid4's world-class customer care team.
