THE GRID4 EXPERIENCE

Our roots are in telecom, but leave the stereotypes at the door. We're leaner and we adapt to your business needs. We're great at what we do because we love it. We listen to you, we care what you think and we make sure you have a great experience.

100% Simple

100% IP

100% Smart

BUILT FOR SUCCESS

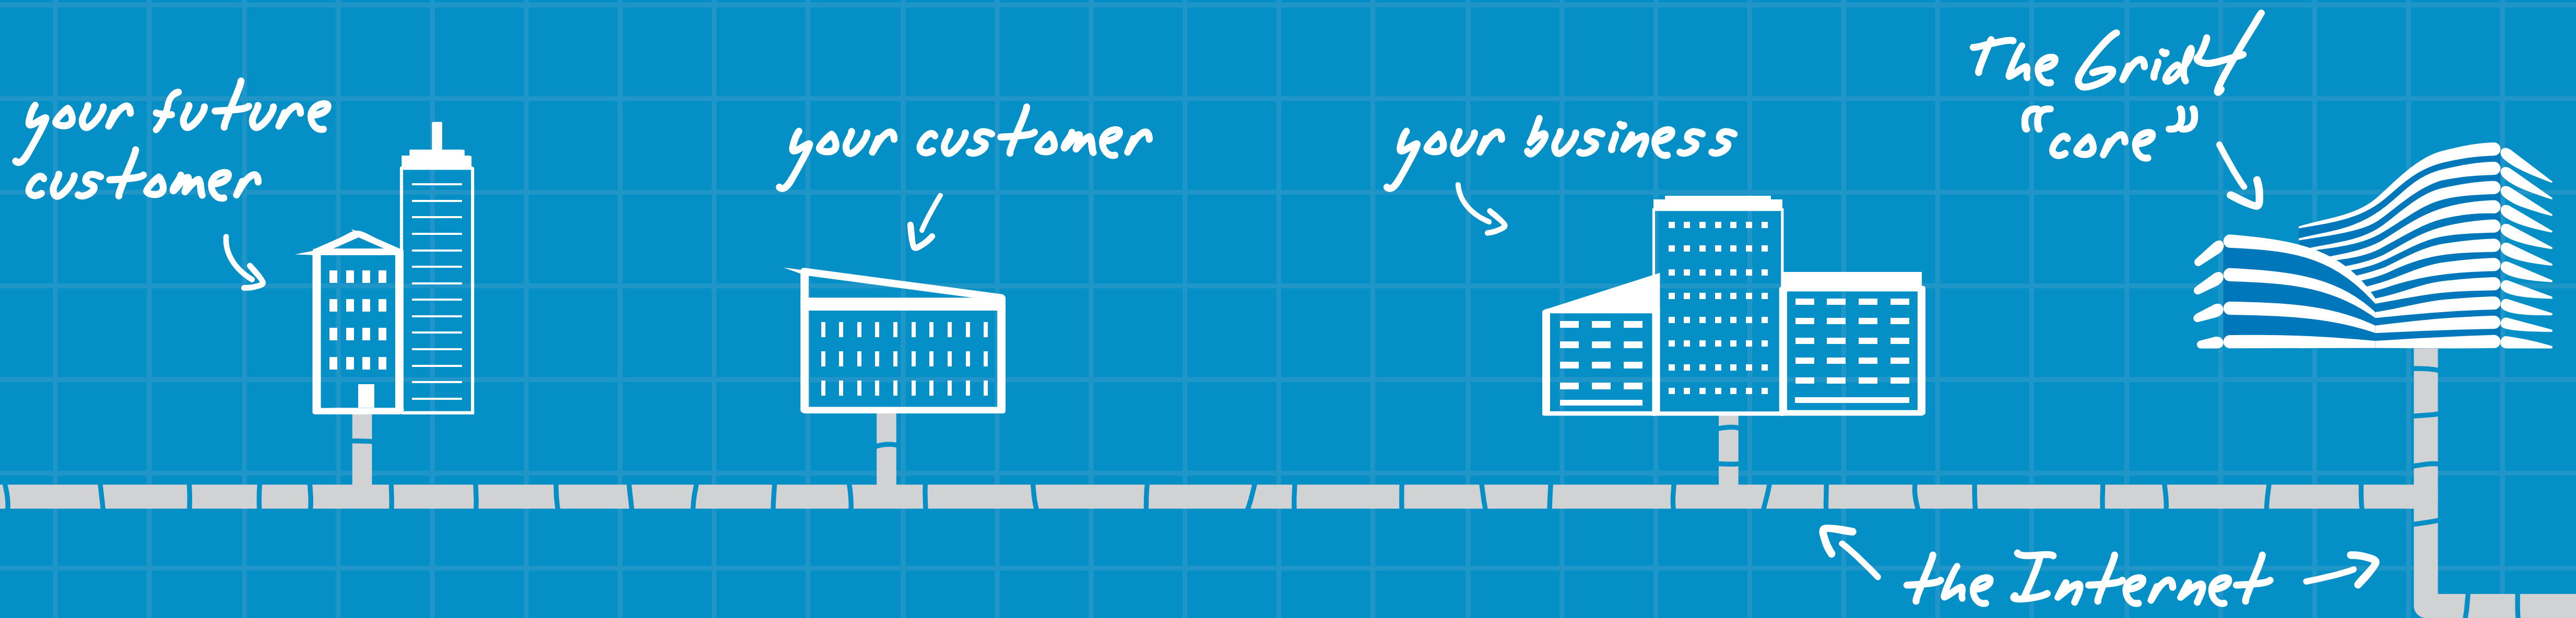

Reliability, (QoS) quality of service, capabilities and speed.

These are what matter to your business and our network has them all. We've invested in the technology to build it, our team of experts run it and it has the reliability you expect.

Voice over IP? We do that.

Session Initiation Protocol? Standard.

Multi-Protocol Label Switching? Yep, we do that too.

SMARTCOMM™ IP COMMUNICATION SOLUTIONS

← powered by great people

SmartCOMM™ Hosted IP Complete

As the name implies, SmartCOMM™ Hosted IP Complete is a complete communications package. It uses today's technology to give any size business an alternative to the traditional approach. Hosted IP Complete will replace your old phone system, give you additional features, will still cut your costs and we'll take care of all the upgrades.

SmartCOMM™ VoIP

Voice and Internet over a high-speed connection... It's brilliant. We didn't invent it, we're just doing it better. Voice over IP cuts your costs, boosts reliability and makes things more efficient on your end. It just makes sense.

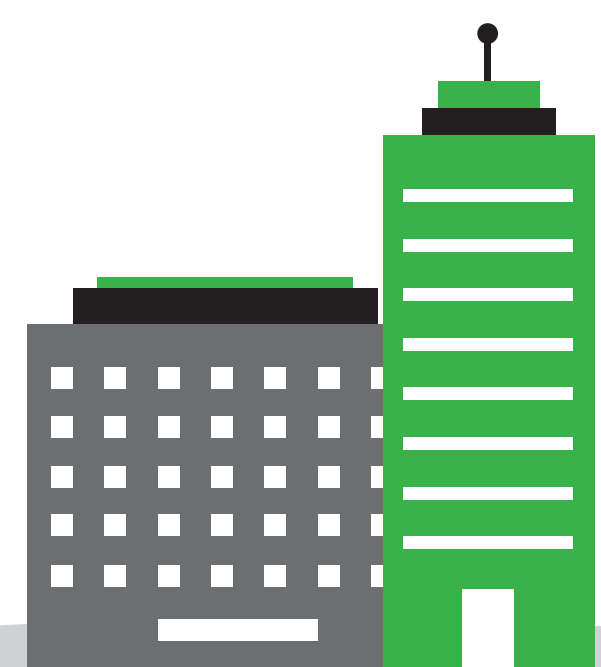

your friend's house

SmartCOMM™ Dedicated Internet Access

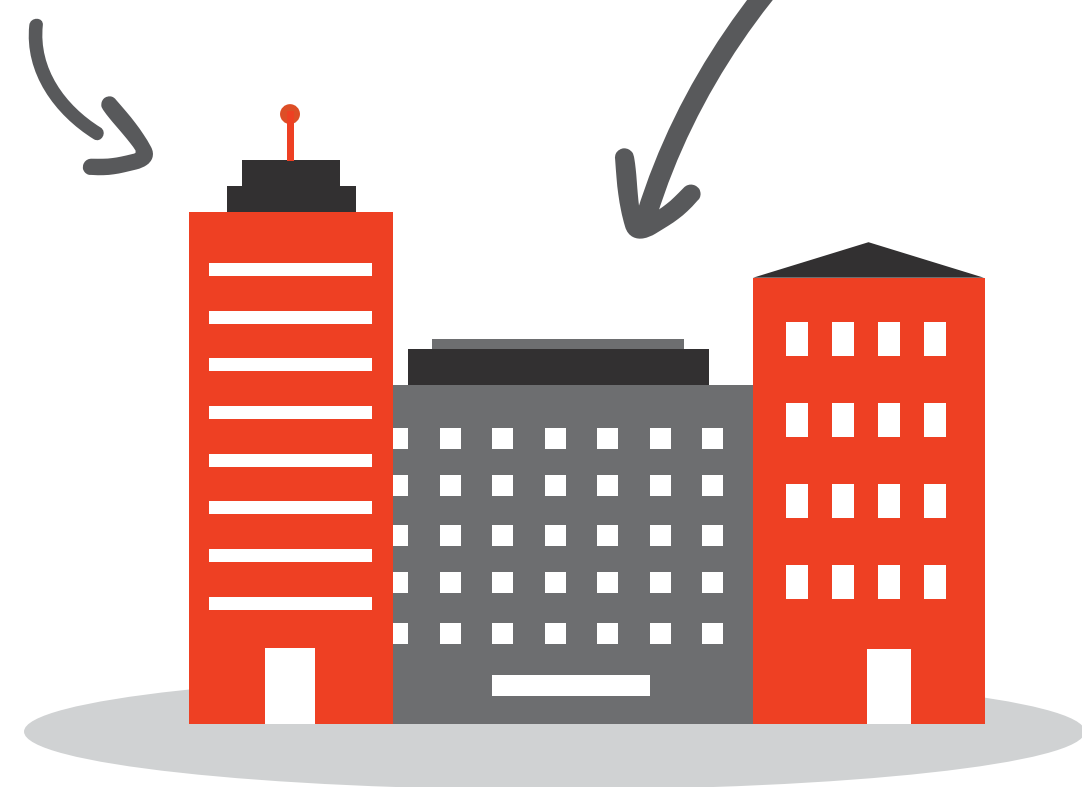

The Internet is the gateway to your customers. Speed, reliability and quality of service are the keys to the game. Whether you need a T1, ethernet or high-capacity fiber, we offer them all at a better value than anyone.

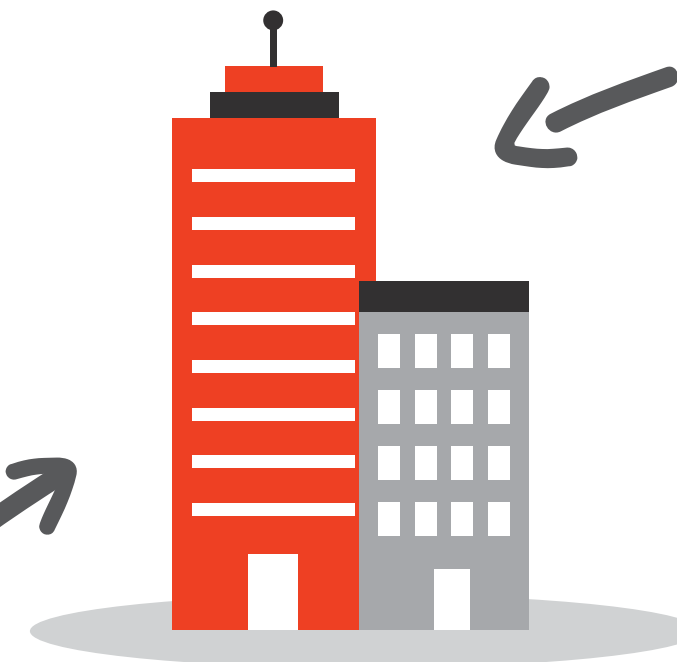

SmartCOMM™ MPLS IP-VPN

If your business has multiple locations, this one's for you. Faster speeds, greater reliability, more options, more bandwidth and lower network costs are right around the corner. Upgrade your network today. Your WAN deserves it.
