Grid4 SmartCOMM®
SD-WAN

A smarter connectivity solution that is designed, configured, implemented and managed by Grid4

SD-WAN FEATURES

- Same IP Address Seamless Failover

- LTE/5G Emergency Voice Failover

- Dynamic load sharing across multiple active connections for better traffic flow.

- Ability to drain Internet traffic without the need to tunnel it back to Grid4's core.

- Grid4's SD-WAN service is delivered using a single integrated device.

- Detailed Network Monitoring

- Use "commodity Internet service" to bring locations into a MPLS enabled network.

- Protects your cloud-based applications including VoIP.

MAXIMIZE INTERNET UPTIME

SD-WAN minimizes downtime due to Internet outages saving your businesses thousands of dollars per hour in lost productivity.

INCREASED IT STAFF PRODUCTIVITY

Grid4's resilient and reliable SD-WAN solution frees up IT staff to focus on more strategic activities.

INTELLIGENT TRAFFIC ROUTING

Grid4's equipment uses advanced algorithms to learn about the available links and direct traffic real-time to the best link option, eliminating the need to define your traffic flows.

MORE ON-NET OPTIONS

Grid4's Integrated network design allows for more on-net options for SD-WAN services supported by multiple NNIs with Tier 1 providers.

COST EFFECTIVE

Predictable OPEX expense instead of a large CAPEX equipment investment.

# Smarter Communications That's Reliable and Provides Savings

TRUSTED, RELIABLE AND SECURE

Unlike other providers, Grid4 Communications® is a telecommunications carrier and a Managed IT services provider, this ensures your organization receives competitive calling plans as well as industry leading technical services - all from one source.

- Grid4 is a Microsoft Certified Partner which provides customers with the expertise and comfort of knowing trusted, local support is immediately available.

AGILE, STREAMLINED DEPLOYMENT

Grid4's implementation team provides the necessary tools and training to increase business productivity quickly. Our teams work with your schedule to ensure success.

SD-WAN helps maximize Internet uptime through intelligent traffic routing that generates efficiencies in your network.

Grid4 SmartCOMM® Business Solutions

Cloud Phone System
A future-proof alternative to on-premise phone systems. Grid4 has been delivering cloud phone system solutions to businesses since 2007. Communicate smarter with more ease and flexibility, maximizing productivity and performance.

IP Voice (VoIP)
Grid4 has over 20 years of experience delivering the highest quality SIP and PRI VoIP solutions via a carrier grade softswitch and network.

MPLS IP-VPN
Connect your employees at multiple locations on a dedicated and reliable private network.

SD-WAN
Maximize your uptime by utilizing multiple Internet connections, while lowering operational costs and efficiently monitoring bandwidth usage for single or multi-site deployments.

Dedicated Internet Access
As a true carrier, Grid4's interconnected network leverages multiple tier-1 networks across the globe to deliver high-speed Internet access solutions.

Managed IT Solutions
Grid4's Managed IT Solutions optimize the efficiency, productivity, and agility of your IT environment, so you can focus on growing your organization.

Our highly knowledgeable team provides strategic guidance, best practices, lifecycle services, network monitoring, comprehensive support, and more to help maintain your infrastructure, reduce costs, and minimize risk.
